

## PRESS RELEASE

### Biologic entertainment for everyone!

Since November 2018, Bluedot-tech offers a fun and simple culture kit. This kit introduces slime molds (*Physarum Polycephalum*), unicellular organisms unknown by most of people, as scientific entertainment. This product is available in French and English to individuals residing in European Union.

#### A culture kit for individuals

Bluedot-tech offers the first slime mold culture kit aimed at individuals. This all-in-one product includes an illustrated manual and necessary tools to discover slime molds and easily grow some at home. Visual and fun, this kit is a simplified introduction to Biology.

More information about this product here : <https://blob.bluedot-tech.fr/en/>

#### What is a slime mold ?

Slime molds (*Physarum Polycephalum*) are unicellular organisms that are visible to the naked eye.

They can be found naturally through the undergrowth and other dark and moist places.

They act like "cleaners" by feeding on bacteria, mushroom spores, viruses and other microorganisms.

They live easily in non sterile domestic environment such as a house. Oat flakes easily replace their natural diet. They are harmless and require little maintenance.

They are experimented on in laboratories for their interesting abilities :

- They move to explore their surroundings and to find food sources. They form networks while spreading to carry nutrients more efficiently.
- When several kinds of food are available, they choose the most suitable one for their metabolism.
- When cut, they heal in minutes.

- If a slime mold is divided into several parts, each part will become an independent clone.

- Every slime mold might live forever. It enters a state close to hibernation when its environment dries.

## Cultures examples

Here are experiments led by clients who used this culture kit :

## About Bluedot-tech

Bluedot-tech French Simplified Joint Stock Company (SAS) created in August 2018 by Nicolas HAYAMMES and Alexandre DELPOMDOR. It is specialized in scientific entertainment and innovation.
